of data will be created every day by 2025

IDC

In the US, hospitals and insurers use AI to manage care for about **200 million** people in the United States each year

A 2019 study showed that this algorithm was less likely to refer black people than white people who were equally sick

Evitare i rischi e cogliere le opportunità

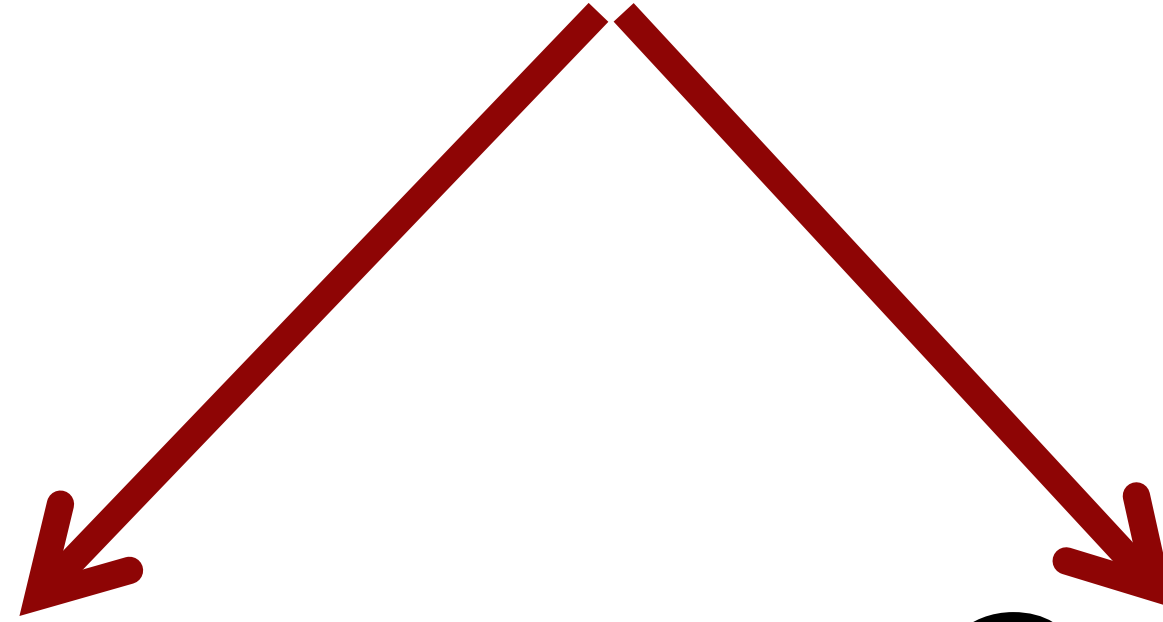

# Outline

Le società dell'informazione

La rivoluzione digitale

Un messaggio

Il digitale cambia il modo in cui

Facciamo le cose

Capiamo le cose

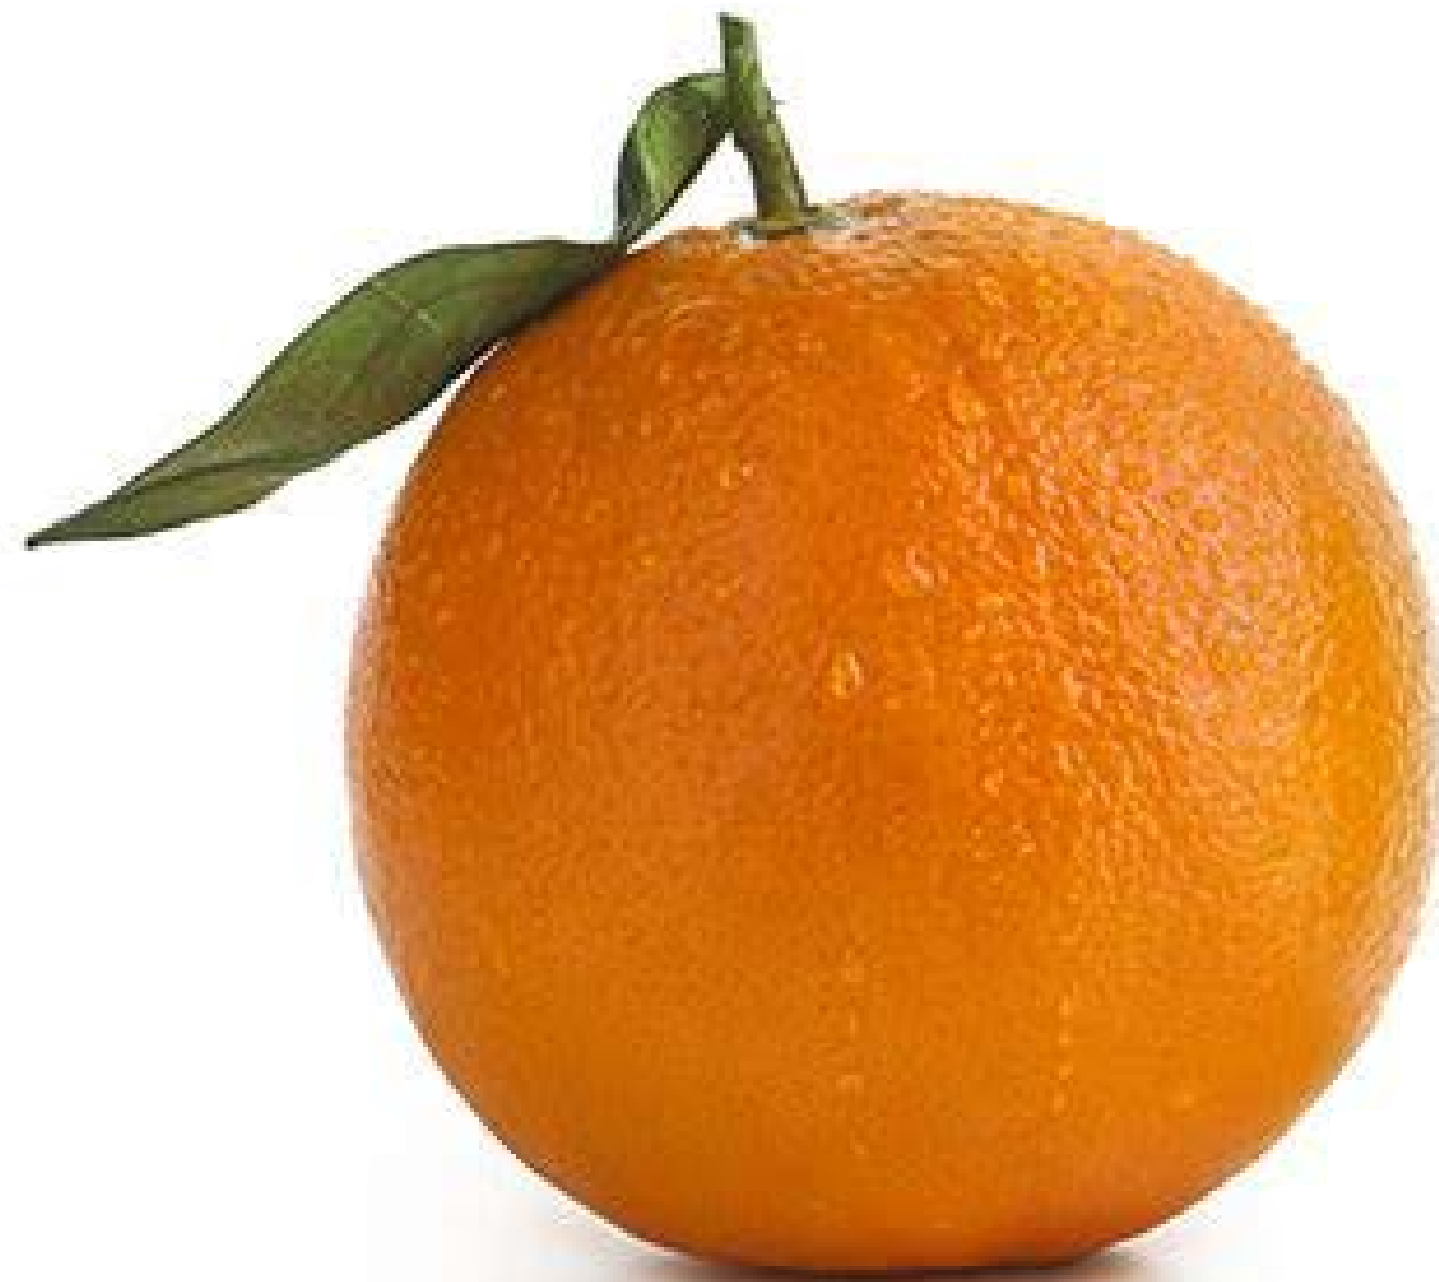

*Redesigns* l'ambiente, le nostre interazioni, la  
nostra comprensione

Il digitale taglia e incolla la realtà.

Unisce, separa e riunisce caratteristiche della realtà e le nostre assunzioni rispetto ad essa

(Floridi 2018)

reale & virtuale

guerra  $\neq$  violenza

territorialità  $\neq$  sovranità

agency  $\neq$  intelligenza

online & offline

Data storage and security, servizi, supporto *outsourced*  
*Acesso, gestione, analisi distribuita e ubiquita*

*Team ibridi*

AI + human skills reduce cancer diagnostic error  
to 0.5%

An abstract 3D pattern of interlocking cubes in various colors (blue, purple, yellow, orange) on a black background, creating a sense of depth and complexity. The cubes are arranged in a grid-like structure that recedes into the distance.

Fiducia senza comprensione e  
prevedibilità

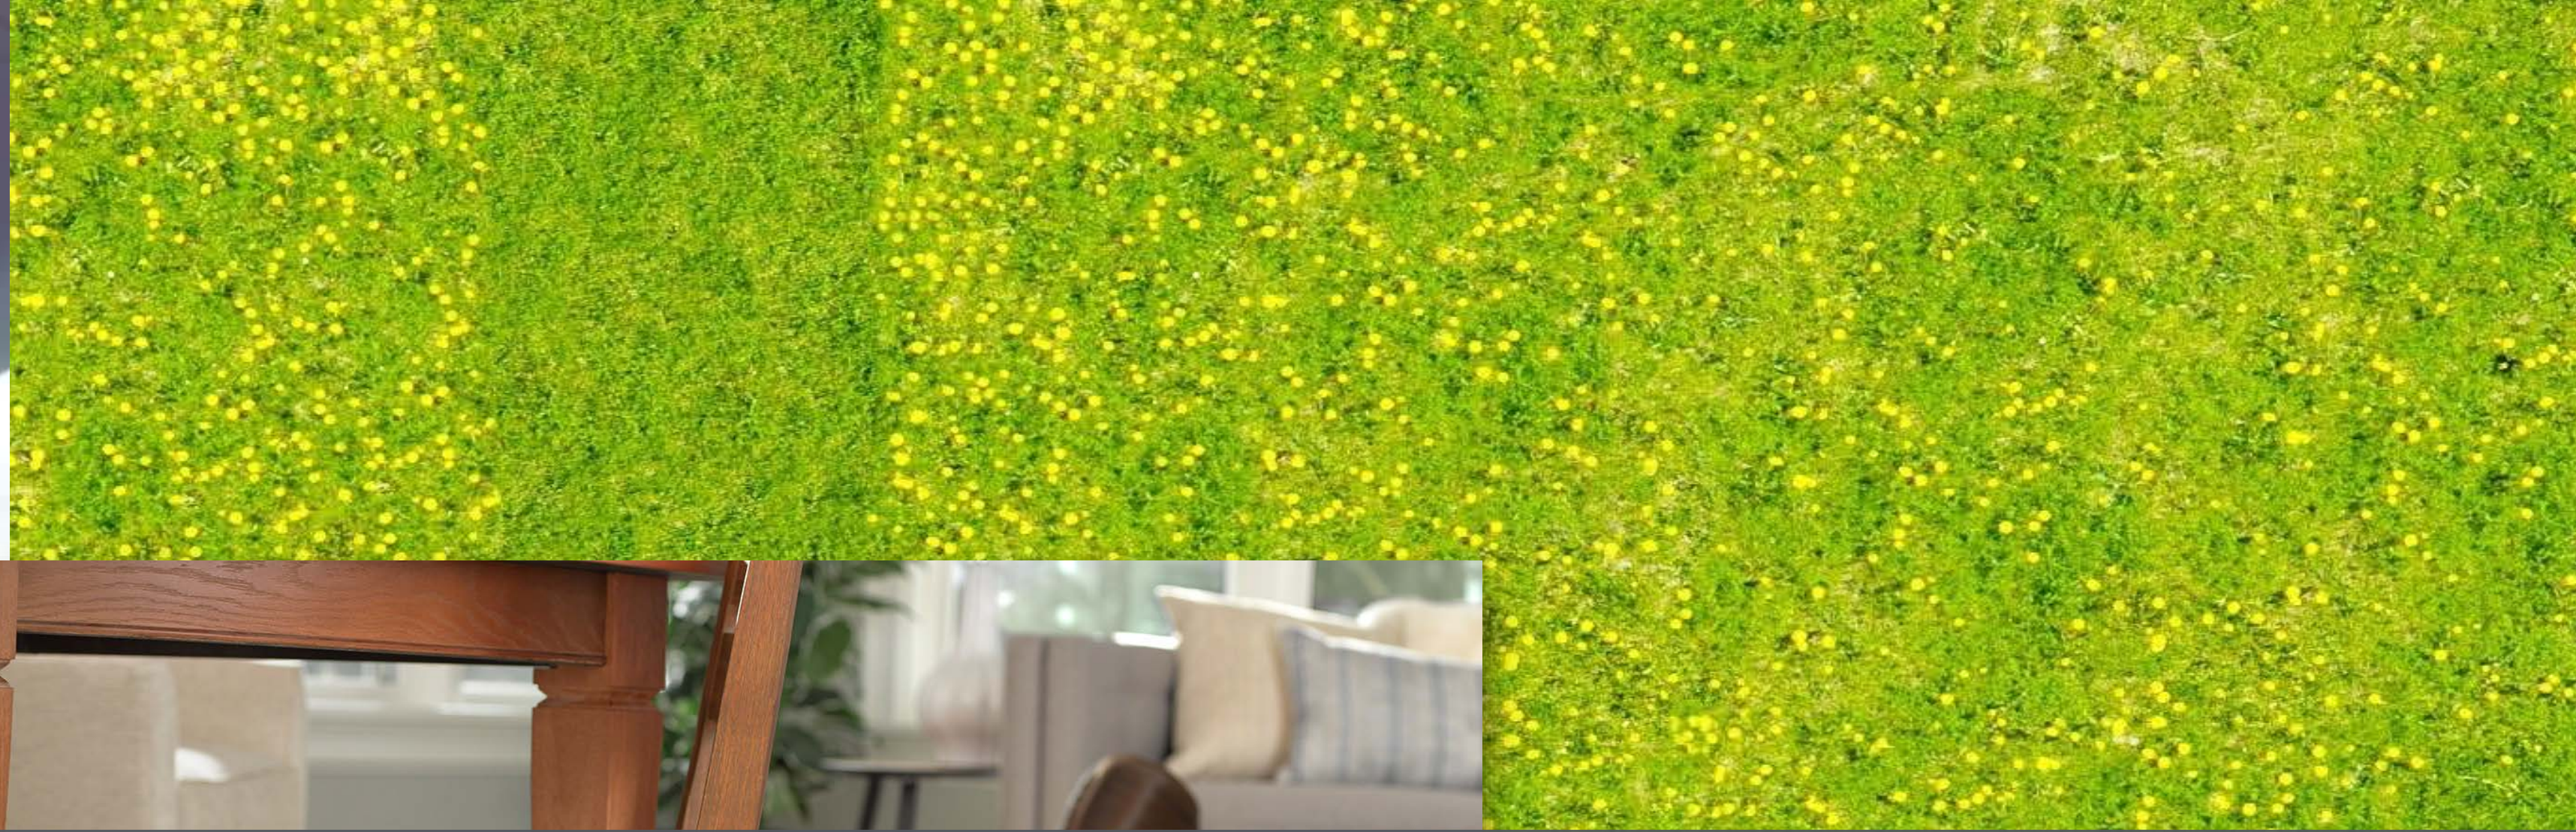

I piloti devono  
saper far atterrare  
un aereo, per  
poterlo fare  
quando l'IA  
fallisce

L'IA è un facilitatore invisibile che media le nostre interazioni  
in un modo conveniente e appena percettibile

Più digitale deve significare più *human flourishing*
